## FROM LONDON &amp; PORTS OF CALL.

THE S. S. "Oskio" having arrived, Consignees of Cargo by her are hereby informed that their Goods are being landed at their

think ill of him until forced to do so by evidence. If you are possessed of such convincing evidence I will thank you to afford me an opportunity to examine it. If you have nothing of the kind I submit that it is unjust and unwise to assail the character of a gentleman, who has heretofore been held in high repute. Every successful raider upon the reputation of another is not necessarily a saint, neither is his victim always a demon. Justice too often characterizes the actions of Government and officials, to entitle such actions to the blind endorsement of the world.

Thus it will be that Mr Bailey has done no wrong, and is fully able to make it so appear to his Government and in the meantime, in the absence of all facts known to his office, he has been deprived of his respect, he should in my judgment be exempt from newspaper condemnation. As to Judge Denny's appointment I think you will find it due to far different influences from that you have mentioned. That he will make a good and successful Consul-General, as Mr Bailey has done, at Shanghai, are no questions.

Your obedient servant,  
AMERICUS.

Yokohama, February 2nd, 1880.

Now, this letter is only a fair and mainly protest against newspaper condemnation based upon imperfect information, but it ought at the same time to show to Mr Bailey the strong necessity that exists for a public rebuttal of the charges which have been so publicly brought against him in published official documents. In the *New York Times* brought on by this mail there appears a lengthy despatch from Col. Mosby, in which a series of charges against his predecessors of the Hongkong Consulate are made in detail, backed by affidavits, extracts from Consular records, and other evidence. This despatch—a lengthy précis of which appears in the weekly *Alto California* of Jan. 10—is the same document that was found to have been abstracted from the records of the State Department; and it would now appear that its temporary disappearance is due to the energy and "enterprise" of American journalism. Be that as it may, it may be remarked that the witnesses against Mr Bailey are American shipmasters and others, his own Consular records and the accounts forwarded to the State Department. Colonel Mosby, so far as at present appears, has merely, in conjunction with his co-Commissioner (General Stahel), forwarded certain evidence and reported upon the same. If, therefore, satisfactory explanations can be given of these circumstances, Mr Bailey's friends will have good reason to rejoice. In the interests of honesty and right, and for the sake of the fair fame of foreign officials, which ought to be maintained clear and spotless before semi-civilized observers, we sincerely trust that much may be explained that now looks dark and unanswerable.

In connection with this subject it may be noted that several rumours have originated in the States, to the effect that Colonel Mosby has been recalled. This may have arisen from the fact that the present Consul has signified his intention to resign his appointment so soon as the reconstruction rendered necessary by his investigations has been completed. Colonel Mosby, however, will suit his own time, and will not, we have every reason to believe, be hastened in his movements by the State Department. His departure will at the same time illustrate the truth, that a man of staunch honesty and sufficient capacity to perform the important duties of U. S. Consul at this port will be difficult to obtain at the salary now fixed for that post. The remuneration, under the old régime, was handsome enough; but, strictly and honestly administered, the pay is such as to exclude men of the highest character whose abilities would command a far greater recompense at home. This is a phase of the question which the State Department at Washington, and those pledged to the proper maintenance of American interests abroad, would do well to study and endeavour fully to comprehend.

#### REUTERS' TELEGRAMS.

(SUPPLIED TO THE "CHINA MAIL.")  
(Per E. B. & O. Telegraph Co.'s Line.)

#### RUSSIA.

London, Feb. 14.

A Liberal Candidate has been elected for Barnstable in the room of the deceased member.

#### THE IRISH RELIEF FUND.

London, Feb. 14.

The Baroness Burdett Coutts has given £5,000 towards Irish relief.

#### PAACIFIC SPORER BY THE EMPIRE OF GERMANY.

London, Feb. 14.

The German Parliament has been opened by the Emperor, who made a most pacific speech.

#### LOCAL AND GENERAL.

The next French Mail may be expected to arrive here tomorrow, the 18th, by the M. M. steamer *Arcturion*, which left Saigon on the 14th. She brings London dates to January 31st.

The next French Mail may be expected to arrive here on or about Friday next, the 20th inst., by the P. & O. steamer *Lombard*, London dates to the 16th ult. are brought on by this opportunity.

The Spanish man-of-war *Doña Maria de Molins* and the S. S. *Zaiman* have gone over to the Cosmopolitan Dock.

We are requested by the Sheriff to mention that the Special Jurors summoned in the case of Webster v. Dawson and ano. need not attend until Monday, the 23rd inst., at 10 a.m.

The rooms at the City Hall are rapidly filling with Art Exhibits. Contributors who have been delayed by wet weather from sending articles on loan, are requested to do so, as early as possible. The exhibition, both as to quantity and quality, promises to be most successful.

The new Attorney General, Mr O'Malley, is now in Yokohama, and may be expected to arrive here by the next steamer, in eleven or twelve days. Mr Russell then goes home on leave by first opportunity. There will be no other change in the appointments.—Mr Tommochy continuing as Acting Colonial Treasurer, and Mr O'Leary as Senior Police Magistrate.

It may interest our sporting readers to know that there is at present plenty of good sport to be had within an easy distance of Hongkong. Mr W. Schmidt, gunmaker, and party of friends spent three days lately in Mira Bay, where they had some excellent shooting. Wild ducks and other birds were plentiful, but as the weather was wet and accompanied by high wind they were only able to have one day with the gun; the sport however was so good on that one day as to compensate nearly for the disappointments of the other two. The weapon used was of a large calibre, an inch in diameter, and on several occasions brought down no less than four birds at a time. The bag, to three guns, counted over twenty birds.

An accident occurred in the harbour on Saturday afternoon, which resulted in the death of a boy about ten years of age. It appears that a large junk was sailing eastwards and ran down a sampan when opposite Tsim Tsai Tui, and it is said that, with the proverbial objection of the Chinese to rescue any one from the god of the water, the junk's crew continued their voyage towards the Ly-se-moon passage without making the slightest effort to assist the poor people of the sampan. A report was made to Sergeant Hanson at Whitefield Police Station, who caused the arrest of the junk at Shau-ki-wan, where she now lies. Two of the crew have been charged with the manslaughter of the boy, and the circumstances of the case will form the subject of an investigation before the sitting Magistrate on Monday morning next.

We have received from the Post Office specimens of the new one-cent and three-cent Post Cards which arrived from England by last mail. They are neatly printed on very much better cardboard than that hitherto in use. Ordinary ink does not run when used in writing on them, and as the stamps are engraved not adhesive, the cards are well adapted for printing on, and can thus be converted into very handy memos for sending by post. The one-cent card is intended for transmission to local Ports (viz. those of China, Japan, Siam, Coochin China, Tongkin, and the Philippines), whilst the three-cent card is to be used for other Union countries, regardless of rank. We are requested to state that persons who have purchased the temporary cards hitherto in use can exchange them for new ones at the stamps at any of the Post Offices or Agencies in Hongkong or China. Also that residents on the Coast who send their correspondence in covers to the Hongkong Post Office can obtain acknowledgements by simply enclosing a one-cent card addressed to the sender. It would come back with the stamp of the Hongkong Office on it, and arrangements will be made to mark such acknowledgements cards "To be sent" when the correspondence has missed the mail.

The Criminal Sessions will be opened to-morrow; the following is the calendar:—

1. Wong Ahong, (1) robbery and assault being armed and wounding, and (2) assault occasioning bodily harm.
2. Ho Ah-ee—obtaining money under false pretences.
3. Chung Afuk—larceny.
4. Chung Afuk (the same)—larceny.
5. Ip Ahung—larceny from the person.
6. Ip Ahung, Chin Ahung, Sin Ah, Ho Ahung—robbery with violence being armed; two counts.
7. Chan Aoi—(1) breaking and entering a dwelling house and committing a felony therein, (2) receiving stolen goods.
8. Chan Ahum—larceny by a servant.
9. An Ah, Cheung Fak, breaking and entering a dwelling and committing a felony therein.
10. W. Donnelly, J. Doherty, and C. Donnelly—robbery with violence.
11. Leung Tai Ho (1) larceny, (2) receiving stolen goods.

The recent elections in England affect the Party division of the house in no way whatever. The member for Liverpool who died, Mr John Torr, was a Conservative, and a representative of the same colour takes his place. In the same way the "deceased" member for Barnstable was a Liberal and a Liberal takes his place. Of course, the Liverpool election will be made the most of by the Conservatives at Home. It shows perhaps their better organisation as compared with the Liberal Party. The Liberals will be wise enough to take the lesson to heart in view of the General Election, which cannot now be so very far off, at the utmost.

CONTEMPORARY weather, and the fact that the Iron Duke left harbour in the morning, the entertainment at the Temperance Hall last night was well attended. The evening was enjoyable and was evidently enjoyed by those present. As instrumental music there were two piano duets, which were worthily performed and well appreciated. The comic element in the vocal part of the entertainment was fully sustained by a rattling song about drummers, fiddlers, barbers and parsons, which elicited roars of laughter. And the other vocal efforts were of a varied kind, solos, glees and part songs. "Miss Ken," who has recently made unto herself a name as an amateur prima donna of great excellence, sang several songs, and proved herself to be in probably better voice than we have ever yet heard her,—one sang a given in response to a vigorous encore. "Mr Rackett" sang "Tom Bowling." Two or three glee parties discoursed sweet strains, in one of which two or three ladies took part. The well-known "Damo Darden" was amongst the gloss given; and it did of course went swimmingly, as indeed did the entire programme. A Marine sang "The sea is England's glory" with great clearness and spirit; but he subsequently overtaxed himself somewhat with "The Death of Nelson." The chair was occupied by Rev. J. Henderson, whose departure from the Colony will be felt considerably in connection with these pleasant and useful entertainments, as well as in other ways.

We have to acknowledge receipt of the first volume of Mr J. R. Black's new work "Young Japan." It is entitled "A Narrative of the Settlement and the City (Yokohama and Yedo) from the signing of the Treaties in 1858, to the close of the year 1879; with a glance at the progress of Japan during a period of twenty-one years." Mr Black has undertaken a task for Japan and its present capital which we trust ere long to see performed for China and for Hongkong; and we are glad to be able to congratulate the author upon the readable volume which he has produced in the partial development of his plan. Although, as Mr Black puts it in his preface, "to the dignity of history this book makes no pretension," and although the narrative form adopted has favoured an easy looseness of style more than the dignified tone historical, still the book forms an unquestionably valuable contribution to the modern history of Japan. It will prove a useful addition to the scholarly work of Mr W. Griffiths, "The Mikado's Empire," and, when completed, will furnish a fairly complete historical sketch of the most eventful quarter century of Japan's existence as a nation. Chapter XXXV. may be taken as a fair sample of Mr Black's historical narrative, and besides the undoubted advantage of having a collection of incidents truthfully described, it must be admitted that the author has succeeded in making the book interesting even to outsiders. His sketch of the crisis in Japanese affairs when, in the year 1855, the ratification of Treaties with Foreign powers was obtained from the Mikado, is graphically written; and although, as the author admits, there is much in the book that will interest local readers only, there is not lacking pleasant and instructive reading which will interest all who value records of the development of our modern civilisation.

The book is modestly bound, well printed except in some minor points of detail, and embellished with over a dozen photographic illustrations.

#### THE CHINESE HOSPITAL AT AMOY.

THE report for 1879 for the Chinese Hospital at Amoy by Dr Manson, Physician and Surgeon-in-charge, is a most interesting document. He states that the steady increase in the attendance of patients at the Hospital which has characterised the past six or eight years has been maintained during 1879. The number last year was 3845, as against 3457 in 1878. Of the patients last year 2688 were "out" and 1157 "in." The number of operations more or less grave has risen from 283 to 379, and these are detailed. Those, by no means, however, Dr Manson remarks, represent the actual amount of good the Hospital has been the means, more or less directly, of effecting through the students who from time to time have left the Hospital and now practise on their own account. As the subject has been misrepresented and in such a way that the interests of the Hospital may be prejudiced, Dr Manson avails himself of the opportunity this report affords to acquaint the friends and supporters of the Institution with the exact relation the former students have to himself and the Hospital and the work on which they are engaged. He explains carefully that his scheme to establish a native practice was founded on the ordinary pounds, shillings and pence basis. He says, if it can be proved to be a source of wealth to the students and that any foreigner who takes it in hand does not necessarily lose by it, then he is confident it contains the germs of a bigger result than at first one could suppose. There is not much money profit to be expected from the conduct of the scheme. Dr Manson says:—

As regards the profits of the students I cannot speak so accurately, but taking my own experience as to the profit in procuring among and retailing drugs to Chinamen, as a guide, I believe, that what with consultation fees, operations, and profits on the sale of drugs, each student grosses about five times the cost of the drugs he buys. Several of them own to incomes of from \$800 to \$1,500 a year, and their incomes as a rule steadily increase. I do not think we could have better proof that the services of these men are appreciated, or a better guarantee that they will stick to it.

To my way of thinking science has a proselytising mission, and it seems to me that the only lines this scientific mission can be run in must be proselytising ones. All are agreed that the Chinese should have the benefit of our medical science and art. Who will provide the means for introducing, spreading, and maintaining them? Certainly not charity; for so vast a charity is beyond the liberality of the most liberal. It cannot be expected from the Chinese Government, and I believe the proper and only answer is, "The Chinese themselves."

A little help from us at first, just sufficient to introduce the thing and show the good in it, and then put on a proper practical basis it will grow itself. Quinine is as valuable to a man shivering with an ague as a piece of grey shirtings; and when he knows this he will ask for it, be willing to pay for it, and get it. But if grey shirtings were only to be got for nothing from one or two charitable individuals, the mass would probably remain in ignorance of its existence, or the charity of these individuals be soon exhausted. Private enterprise would be choked by the give-away-for-nothing system of the philanthropist, and certainly clothes for the million would not be forthcoming. Left to the wholesome influence of demand and supply, we know how good quinine has been the result, so it should be with Quinine or any other drug. It is a fixed conviction with me that the charity of Hospitals, and similar institutions, unqualified by some such system as I practise and advocate, and presented to the people without adequate explanation and restriction, in China as at home, is a mistake, times its own object, and is a mighty drawback to progress; and, also, that the best guarantee for the progress of foreign medical science in China is that it should be started by the people, who finding it of use, will demand it, pay for it, get it, and have it. I have asked proper questions and have been answered, that having said these things I would seem that there have been misconceptions by some who have not taken the trouble to ascertain the exact facts of the case, or who have different views of the functions of medical science and the way it should be presented to the natives, but I believe I have asked proper questions and have been answered, that having said these things I would seem that there have been misconceptions by some who have not taken the trouble to ascertain the exact facts of the case, or who have different views of the functions of medical science and the way it should be presented to the natives, but I believe I have asked proper questions and have been answered, that having said these things I would seem that there have been misconceptions by some who have not taken the trouble to ascertain the exact facts of the case, or who have different views of the functions of medical science and the way it should be presented to the natives, but I believe I have asked proper questions and have been answered, that having said these things I would seem that there have been misconceptions by some who have not taken the trouble to ascertain the exact facts of the case, or who have different views of the functions of medical science and the way it should be presented to the natives, but I believe I have asked proper questions and have been answered, that having said these things I would seem that there have been misconceptions by some who have not taken the trouble to ascertain the exact facts of the case, or who have different views of the functions of medical science and the way it should be presented to the natives, but I believe I have asked proper questions and have been answered, that having said these things I would seem that there have been misconceptions by some who have not taken the trouble to ascertain the exact facts of the case, or who have different views of the functions of medical science and the way it should be presented to the natives, but I believe I have asked proper questions and have been answered, that having said these things I would seem that there have been misconceptions by some who have not taken the trouble to ascertain the exact facts of the case, or who have different views of the functions of medical science and the way it should be presented to the natives, but I believe I have asked proper questions and have been answered, that having said these things I would seem that there have been misconceptions by some who have not taken the trouble to ascertain the exact facts of the case, or who have different views of the functions of medical science and the way it should be presented to the natives, but I believe I have asked proper questions and have been answered, that having said these things I would seem that there have been misconceptions by some who have not taken the trouble to ascertain the exact facts of the case, or who have different views of the functions of medical science and the way it should be presented to the natives, but I believe I have asked proper questions and have been answered, that having said these things I would seem that there have been misconceptions by some who have not taken the trouble to ascertain the exact facts of the case, or who have different views of the functions of medical science and the way it should be presented to the natives, but I believe I have asked proper questions and have been answered, that having said these things I would seem that there have been misconceptions by some who have not taken the trouble to ascertain the exact facts of the case, or who have different views of the functions of medical science and the way it should be presented to the natives, but I believe I have asked proper questions and have been answered, that having said these things I would seem that there have been misconceptions by some who have not taken the trouble to ascertain the exact facts of the case, ## Intimations.

## THE CHINA REVIEW.

THE widely-expressed regret at the discontinuance of *Notes & Queries on China and Japan*, has induced the publishers of this journal to issue a publication similar in object and style, but slightly modified in certain details.

THE CHINA REVIEW, or *Notes and Queries on the Far East*, is issued at intervals of two months, each number containing about 60 octavo pages, occasionally illustrated with photographs, photographic woodcuts, &c., and the papers published demand, and the circulation justify, such extra matter.

The subscription is fixed at \$6.50 postage paid per annum, payable by non-residents in Hongkong half-yearly in advance.

The publication includes papers original and selected upon the Arts and Sciences, Ethnology, Folklore, Geography, History, Literature, Mythology, Manners and Customs, Natural History, Religion, &c., &c., of China, Japan, Mongolia, Tibet, the Eastern Archipelago and the "Far East" generally. A more detailed list of subjects upon which contributions are especially invited is incorporated with each number. Original contributions in Chinese, Latin, French, German, Spanish, Italian or Portuguese, are admissible. Endeavours are made to present a résumé in each number of the contents of the most recently works bearing on Chinese matters. Great attention is also paid to the Review department.

Notes and Replies are classified together as "Notes" (head references being given, when furnished, to previous Notes or Queries), as are also those queries (Notes or Replies) which are not answered.

Notes and Replies are classified together as "Notes" (head references being given, when furnished, to previous Notes or Queries), as are also those queries (Notes or Replies) which are not answered.

The *China Review* for July and August, 1879, is at hand. It says that forty-two essays were sent in to compete for the prize offered by the *China Review* for the best paper on the advantages of Christianity for the development of a State. All our learned societies should subscribe to this scholarly and entertaining Review. It is a sixty-paged, bi-monthly, repository of what scholars are ascertaining about China. The lecture on Chinese Poetry in this volume is alone worth the price of the Review. Address: *China Review*, Northern Christian Advocate (U.S.).

*Yü-tsun's Oriental Record* contains the following notice of the *China Review*:—"This is the title of a publication, the first number of which has lately reached us from Hongkong, where it has been set on foot. In some respects a continuation of *Notes and Queries on China and Japan*, the extension of which useful serial a year or two ago has been much regretted by those who were in China. The present publication, judging by the number now before us, is intended to occupy a position, as regards China and the neighbouring countries, somewhat similar to that which has been filled in India by the *Calcutta Review*. The great degree of attention that has been paid to late years upon the investigation of Chinese literature, antiquities, and social developments, to say nothing of linguistic studies, has led to the accumulation of important stores of information, rendering some such channel of publicity as is now provided extremely desirable; and contributions from the members of the foreign consular services, the Chinese Customs' corps, and the missionary body, among whom a high degree of Chinese scholarship is now assiduously cultivated, and who are severally represented in the first number of the *Review*, by papers highly creditable to their respective authors. In a paper on Dr. Legge's *She King*, by the Rev. E. J. Eitel, to which the place of honour is deservedly given, an excellent summary is presented of the chronological problems and arguments involved in connection with this important work. Some translations from Chinese novels and plays are marked by both accuracy and freshness of style; and an account of the career of the Chinese poet-steamship of the eleventh century, *Sa Tung-p'o*, by Mr. E. C. Bowra, is not only historically valuable, but is also distinguished by its literary grace. Beside notices of new books relating to China and the East, which will be a useful feature of the *Review*, if carried out with punctuality and detail, we are glad to notice that "Notes" and "Queries" are destined to find a place in its pages also. It is to be hoped that this opening for contributions on Chinese subjects may evoke a similar degree of literary zeal to that which was displayed during the lifetime of its predecessor in the field, and that the *China Review* may receive the support necessary to insure its continuance. The publication is intended to appear every two months, and will form a substantial octavo magazine.

## THE CHINESE MAIL.

This paper is now issued every day. The subscription is fixed at *Four Dollars* per annum delivered in Hongkong, or *Seven Dollars Fifty Cents* including postage to other ports.

It is the first Chinese newspaper ever issued under native direction. The chief support of the paper is of course derived from the native community, amongst whom also are to be found the guarantors and securities necessary to place it on a business and logical footing.

The proprietors, basing their estimates upon the most reliable information from the various Ports in China and Japan, from Australia, Calcutta, Singapore, Penang, Saigon, and other places frequented by the Chinese, consider themselves justified in guaranteeing an ultimate circulation of between 3,000 and 4,000 copies. The advantages offered to advertisers are therefore unusually great, and the foreign community generally will find it to their interest to avail themselves of them.

The field open to a paper of this description—conducted by native efforts, but progressive and anti-objective in tone—is almost limitless. It is on the one hand commands Chinese belief and interest while on the other deserves every aid that can be given to it by foreigners. Like English journals it contains Editorials with Local, Shipping, and Commercial News and Advertisements.

Subscription orders for either of the above may be sent to

GEO. MURRAY BAIN,

China Mail Office.

## NOW READY.

THE HISTORY OF THE BUDDHISTS OF NATURAL SCIENCE IN CHINA. By Dr. E. J. Eitel. One Volume. 8vo. Price, \$1.50.

BUDDHISM, ITS HISTORY, THEORY AND POPULAR RELIGION, in three lectures, By Dr. E. J. Eitel. Second Edition. One Volume. 8vo. Price, \$1.50.

Orders will be received by Messrs. Lane, Crawford & Co., Hongkong, July 21, 1879.

## Merchant Vessels in Hongkong Harbour.

Exclusive of late Arrivals and Departures reported to-day.

To facilitate finding the position of any vessel in the Harbour, the Anchorage is divided into eight Sections, commencing at Green Island. Vessels near the Hongkong shore are marked A., near the Kowloon shore K., and those in the body of the Shipping or midway between each shore are marked C., in conjunction with the figures denoting the sections.

- Section.
1. From Green Island to the Gas Works.
  2. From Gas Works to the Novelty Iron Works.
  3. From Novelty Iron Works to the Harbour Master's Office.
  4. From Harbour Master's Office to the P. and O. Co.'s Office.

- Section.
5. From P. and O. Co.'s Office to Peddar's Wharf.
  6. From Peddar's Wharf to the Naval Yard.
  7. From Naval Yard to the Pier.
  8. From Pier to East Point.
